

DECLARATION OF APPROVAL FOR CONTACT WITH FOOD

3D FILAMENT PLA Plus ProSpeed(Impact)

Date of issue: 22.03.2021

Date of update: 06.12.2023

Material name:

PLA Plus ProSpeed(Impact)

Brand name:

PLA Plus ProSpeed(Impact) filament 1,75
mm

This document confirms that the biopolymer and pigments used to produce PLA Plus ProSpeed(Impact) filament for 3D printing is suitable for use in food packaging pursuant to section 201(s) of the Federal Food, Drug and Cosmetic Act, and Parts 182, 184 and 186 of the Food Additive Regulations. This filament is not intended for medical devices.

It is allowed to use the aforementioned polymer with all food types under the following FDA conditions of use:

- A. Boiling water sterilized;
- B. Hot filled or pasteurized above 150°F (65,56°C);
- C. Hot filled or pasteurized below 150°F (65,56°C);
- D. Room temperature filled and stored (no thermal treatment in the container);
- E. Refrigerator storage (no thermal treatment in the container);
- F. Frozen Storage (no thermal treatment in the container);
- G. Frozen or refrigerated storage: ready-prepared foods intended to be reheated in container at time of use.

It is the responsibility of the manufacturer of the final food-contact article to check that the use of a product is safe, lawful and technically suitable for the intended application. The filament is made of ingredients approved for contact with food. For products that come into contact with food, the certification appropriate for the country rests with the manufacturer of the final product.

Since the production of the final product intended for contact with food is not controlled by ROSA3D, the company makes no warranty, express or implied, and accepts no responsibility in connection with the use of this information.

With best regards,

ROSA PLAST Sp. z o.o.
